DETAILED ACTION

Election/Restrictions

Claim 1 is generic to the following disclosed patentably distinct species:

- I. The embodiment of Fig. 2.
- II. The embodiment of Fig. 3.

In the event that any of the species I and II is elected, these species also contain features directed to the following patentably distinct species:

- a. The embodiment of Figs. 6a-6b.
- b. The embodiment of Fig. 7.

The species are independent or distinct because they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, Species I shows wherein pressure fluid is fed via an inlet channel to a energy charging space and a control rotating valve; Species II shows wherein pressure fluid is fed from an energy charging space to a working chamber via two separate feed channels; Species a shows a connection length of a feed channel adjustable by using an adjustment sleeve residing inside an energy charging space; and Species b shows adjustments sleeves residing in two feed channels.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3721

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
